ABSTRACT

The invention concerns a method providing a user—(2)—with the use of a radiotelephone terminal—(1)—for remotely controlling automatic devices—(3)—supplying fee-paying services. In particular, the invention concerns a method ~~characterized in that it comprises~~including a ~~step which consists in~~ a call by the user—(2)—to a central server—(5), the user (2) dialing, using his terminal, a control number, a ~~step which consists in~~ storing the control number and the identification number of the terminal—(1)—in a storage unit—(53)—of the central server—(5), followed by a ~~step whereby~~ the central server ~~fre~~freeing the line without disconnection, a ~~step which consists in~~ verifying the identification of the device (3)—at least based on the control number, and a ~~step which consists in~~ verifying the user's rights—(2), then, in case of authorization for the user to use his terminal for remotely controlling a device. The method further ~~comprises~~includes a ~~step of~~ transmission by the central server (5)—to the device (3)—of a command for a specific operation, and a ~~step which consists in~~ execution of the operation by the device.
